Q1. Create a web page with the contents as shown below:

Html Coding Help

Are you a new to learning HTML Coding, hoping to delve into the world of web design or an experienced webmaster keen to improve your skills, we have top Html coder which provide online Html expert help tailored to your web design needs and in HTML coding Help. Our Html Expert will turn you from HTML Assignment Help to Web designing in just a few hours. Unlike many other HTML Assignment Help websites, it's a step-by-step guide with proper comment and hints for coding to understand. Don't worry we have lots HTML projects and examples for you to use them and can learn faster if need HTMl Tutorial. send your HTML Coding Help request Here!

- Change Background color or images
- Font section (Type, size)
- Check Color name, Color Codes
- Adding Comment Box
- Adding or Removing Scrolling features in page
- Create / Display, filter data in Table

- HTML Marquee
- HTML Music
- HTML Video
- HTML Form
- HTML Frames

Q2. Create a web page with the contents as shown below: (There are three different tables)

BEST HTML5 SITES OF 2019

The Wilderness Downtown

The Wilderness Downtown is an interactive music video for Arcade Fire's song "We Used to Wait". Visitors are asked to input the address of the home they grew up in and then the site uses Google Earth and HTML5 to create a personalized music video that takes the user on a journey back home.

Heart of The Artic

Heart of The Arctic takes users on an Arctic expedition/scavenger hunt through four distinct environments designed to show users the steps that would be needed to restore climate balance to the arctic region. This site perfectly showcases how Html5 can be used to create fun and educational websites.

Three Dreams of Black

3 Dreams of Black uses HTML5 to promote Danger Mouse and Daniele Luppi's album Rome. The site creates a 3D interactive world using WebGL where all the objects in the video react to both the music and user inputs. The site will make you feel as if you've EXPERIENCED the song and not simply listened to it.

Enjoy Your Privacy

The website was created to warn consumers about the dangers of not using password protection on their mobile devices. This is done by using Html5 to produce a second-screen experience that will truly scare those that hitherto have avoided password protecting their mobile devices. So protect yourself.

Google Play Music Tour

Google here uses Html5 to showcase the many features of its Google Play streaming music service. This is one of the prime examples of how the integration of video, sound, and interactive graphics can be brought together with Html5 to create an exciting and fun product promo that can drive consumer usage.

Soul Reaper

A scroll activated digital comic book developed by Saizen Media uses HTML5 to breathe some new live into the presentation of graphic stories. The added motion and pacing makes the static images and story seem to come alive in a way that seems to be a bridge between old comics and video.
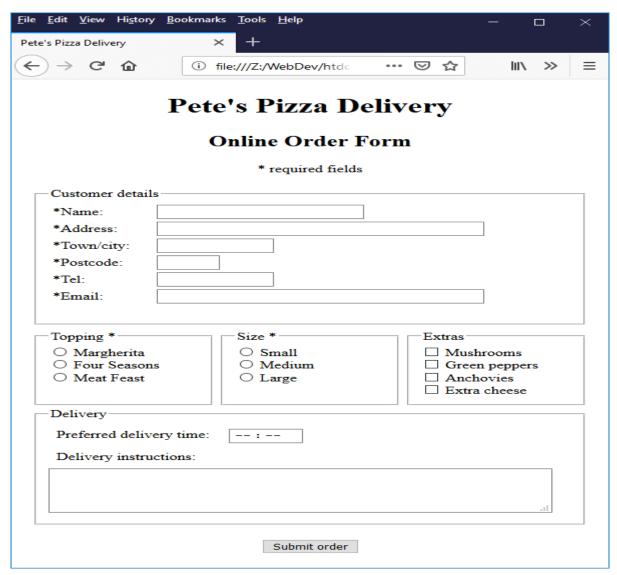

The Expressive Web

Adobe created the Expressive Web website to highlight the functionality and creative potential offered through the use of HTML5 and CSS3. Through various examples and code snippets this is truly the best "advanced" HTML5 user guide we've seen. This site should be bookmarked by all HTML5 developers.

Design by : Your Name

Q3. Create a web page with the contents as shown below:

Preceding Text

I.   List Item 1
     a.   Nested Item 1.1
     b.   Nested Item 1.2
II.   List Item 2
     1.   Nested Item 2.1
     2.   Nested Item 2.2
         o   Nested Item 2.2.1
         o   Nested Item 2.2.2
             ▪   Nested Item 2.2.2.1
             ▪   Nested Item 2.2.2.2
         o   Nested Item 2.2.3
     3.   Nested Item 2.3
III.   List Item 3
     •   Nested Item 3.1
     •   Nested Item 3.1
     •   Nested Item 3.1

Q4. Create a web page with the contents as shown below:

File   Edit   View   History   Bookmarks   Tools   Help
